

BUSINESS VALUE ACCELERATOR

From blueprint to verified run-state

The LEIT Data and AI Platform delivered end to end through governed, human-in-the-loop agentic orchestration.

7.2x

less delivery friction
(illustrative)

Human

gates every delivery wave

End to end

blueprint to run-state

1 Blueprint overlay

Reference architecture aligned to your blueprint, Ingest through Context Layer.

2 Readiness gates

Humans approve readiness before each wave; the orchestrator halts on gaps.

3 Agentic delivery waves

Dependency-ordered execution against prioritised Platform Assessment findings.

4 Verified run-state

Routes on to Data Care Pack run-state and FinOps or Security accelerators.

Why LEIT

- Not generic agentic consulting - a typed catalog graph tied to the platform capability model.
- Not workshop-only blueprinting - components connect to a governed build-and-verify loop.
- Humans gate readiness at every delivery wave.
