

LEIT Data Model Studio

Prompt-native modelling with human approval gates and deterministic DDL across six dialects.

49

skill packs guide modelling

6

SQL dialects, plus dbt YAML

Human

approves every change

1 Prompt

Method-guided prompts drive the workflow across 49 skill packs.

2 Propose

AI proposes a method-grounded model, not raw SQL.

3 Human approve

A human approves every structural change.

4 Deterministic DDL

Emitters ship governed DDL across six dialects, plus dbt YAML.

Why LEIT

- A governed system of record with human review on every structural change.
- Deterministic emitters ship governed DDL instead of raw LLM SQL.
- Full provenance audit trail, RBAC, and Snowflake Native App packaging.
