

Turn friction into a quantified investment roadmap

Paired architect and engineer discovery that exposes business friction, delivery waste, and a build-ready platform plan.

3-4 wk

to a prioritised roadmap

2

parallel tracks: FDA and FDE

ROI

aligned priorities

Step 1 - FDA (Business track)

Business-side architect who surfaces process, data, and ownership friction with stakeholders.

Phase 1 - 3-4 weeks (parallel).

Step 2 - FDE (Delivery track)

Engineering lead who quantifies CI/CD, infrastructure, and pipeline constraints from your delivery stack.

Phase 1 - 3-4 weeks (parallel).

What you get

- Evidence-based issue list scored by hours x cost x frequency.
- Prioritised roadmap mapped to routes-to-live and LEIT capabilities.
- Route-to-live blueprint and platform design decisions.
- Executive readout with steering-committee-ready options.

Book a 3-4 week FDA/FDE discovery sprint
